

Programme to reduce plastic at MAV

The awareness programme was conducted by Chirag Prajapati who is the core team member of My Tool Bag. My Tool Bag is a hyper local delivery market place for local stationery stores of through enabled through an app.

He initiated 'Amdavad's No plastic movement' which is to refuse single use plastic bags and to inculcate the idea of 'shift' from plastic bags to newspaper bags and other alternatives in the society through students. He is resolute with the goal of targeting 100+ students and 50000 bags and to distribute them to the shopkeepers in

entire Ahmedabad. They can mostly be used in Pharmaceutical stores for the medicines. This programme was conducted for scouts and guides of Maharaja Agrasen Vidyalaya. Each scout and Guide made 2 paper bags to be a part of cam-

paign. These bags are economically cheap as they are made from the old newspapers without the use of glue. In this way the use of plastic can be reduced and trees can be conserved by reusing the paper.
